### **DETAILED ACTION**

1. This Office Action is response to Applicant's Amendment filed on 03/17/2005.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian M. Mattson (reg. No. 35,018) on 05/17/2005.

The application has been amended as follows:

The first line of claim 1, "A method for creating websites" please rewrite as "A computer-implemented method for creating websites"

The first line of claim 15, "A system for creating websites for healthcare providers" please rewrite as "A computer-implemented creating websites for healthcare providers"

3. Claims 1-21 are allowed.

### **Allowable Subject Matter**

4. The present application has been thoroughly reviewed. Upon searching a variety of databases, the examiner respectfully submits that claims 1-21 are allowed in light of the applicants' argument and in light of the prior arts of made record.

5. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a computer-implemented method and system for creating website for one of plurality of healthcare providers and consisting of steps of editing the presentation of website wherein one of plurality of healthcare providers selects a preference from a remote server; designing the first web page of website wherein the pre-defined information and one of the predefined attributes on the first web page of website are arranged on the first web page by one of the plurality of healthcare providers via the first remote computer; and requiring predefined information describes amenities of one of the healthcare provides and identifying a location of one of the healthcare provides wherein the web page is created with pre-defined information and further wherein the website is stored on the database.

The closest prior arts, US Patent No 5,793,972 issued to Shane teaches creating a personalized web page and web page creator on the web server computer generating a personalized web page based on data correlated to the personal identification code and web page creator will access, store and merge web page (fig. 1 and col. 4, lines 34-50). And US Patent No. 6,738,754 issued to Norman, Jr. (hereinafter Norman) teaches directing a patient to a source of healthcare information, providing healthcare

information to an Internet user, storing descriptive information about a plurality of ailments in a computer database (abstract, fig. 2 and col. 2, lines 25-67). In combination, Shane and Norman both fail to teach "editing of a presentation of the website, designing the first web page of the website wherein the pre-defined information and one of the pre-defined attributes on the first web page of the website arranged on the first web page by one of the plurality of healthcare providers and identifying a location of one of the healthcare provides wherein the web page is created with pre-defined information and further wherein the website is stored on the database."

These distinct features, in conjunction with all other limitations of the dependents and independent claims render claims 1-21 them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
